

19 Tooth Double Pitch Sprocket C2060H

This is a C2060H 19 tooth double pitch sprocket. It is designed for efficient power transmission.

Product Overview

C2060H Double Pitch Sprocket

The C2060H 19-tooth double pitch sprocket is a precision-engineered component designed for efficient power transmission in industrial machinery. Built to exacting standards, this sprocket ensures optimal performance and durability in demanding operational environments. It is specifically compatible with double pitch roller chains, providing reliable and consistent operation for your mechanical systems.

Technical Specifications

Number Of Teeth	19
Outside Diameter	4.94 in
Pitch Diameter	4.62 in
Hub Type	B

Dimensions

Stock Bore	3/4"
Maximum Bore	2-11/32"
Hub Diameter	3.5 in
Length Thru Bore	1-1/4"
