

190A Portable Diesel Welding Generator

This portable diesel welding generator is a versatile and reliable power source for both welding and electrical applications. With a 190A welding output, it can handle a variety of welding tasks.

Product Overview

Versatile Welding and Power Solution

This portable diesel welding generator is designed for both welding and power generation, making it an ideal choice for industrial and construction sites. With a 190A welding output, it provides reliable performance for various welding tasks while also delivering essential AC and DC power for tools and equipment. The unit features an electric start system and a robust diesel engine, ensuring efficient operation in demanding environments.

Technical Specifications

Welding Output

190 A

Welding Current

Operating Frequency	50 Hz / 60 Hz
AC Output	220V
DC Output	12V 8.3A
Model Type	IF6500EW (Open type)

Features & Safety

Certifications

ISO 9001 • CE

Operational Features

- Electric Start
- Portable Design with Wheels
- Silent Operation

Safety Systems

Low Oil Shutdown, Overload Protection, Oil Alert Lamp, DC Total Fuse
