

# 190mm Circular Saw for Woodworking

This 190mm circular saw is designed for precision cutting in various materials. It features adjustable cutting depth and bevel angle for versatile use.

## Product Overview

### High-Performance Woodworking Solution

This 190mm circular saw is engineered for precision cutting across a variety of materials, making it an essential tool for woodworking, construction, and renovation. It features a robust motor designed for efficient operation and high-performance output in demanding environments. With adjustable settings and durable construction, it provides a versatile and long-lasting solution for both professional and DIY applications.

## Technical Specifications

### Blade Diameter

**190 mm**

Blade Diameter

### Motor Performance

Robust motor for efficient operation

### Construction

Durable construction for long-lasting performance

## Operational Features

### Adjustment Capabilities

- Adjustable cutting depth
- Adjustable bevel angle

## Safety & Protection

### Safety Equipment

Safety Switch, Blade Guard

## Applications

### Ideal Applications

Woodworking • Construction • Renovation
