

190mm Welded Ceramic Saw Blade

This blade is used for cutting hard ceramic tiles, including polishing, rustic, crystal, and glazed varieties. It provides high sharpness, eliminates chipping, and ensures a smooth cutting surface with lasting performance.

Product Overview

High-Performance Ceramic Cutting

This 190mm welded saw blade is engineered for high-hardness ceramic materials, including polished, rustic, and glazed tiles. It delivers superior sharpness and a smooth finish while minimizing chipping during operation. Designed for durability, it is an ideal solution for precision edge cutting, striping, and mosaic applications on both manual and automatic cutting machines.

Technical Specifications

Performance Metrics

190 mm
Diameter

1.6 mm
Thickness

14 T
Tooth Count
