

# 19200mAh 700A Portable Car Jump Starter with QC3.0

This portable car jump starter features a 19200mAh battery and 700A peak current for efficiently starting 12V vehicles. It is equipped with a smart cable with safety protections and QC3.0 fast charging technology for compatible devices.

## ADDITIONAL IMAGES

## Overview

### High-Performance Emergency Power Solution

This portable car jump starter is a versatile and robust tool designed for emergency vehicle starting and mobile device charging. With a substantial 19200mAh battery capacity and a 700A peak current, it provides reliable power for most 12V vehicles, including cars, SUVs, and motorcycles. The unit integrates smart safety features and multiple output options, making it an essential companion for roadside assistance and outdoor activities.
