

# 1950W Electric Wood Router with Adjustable Speed

This electric router is equipped with a 1950W motor for efficient material removal and precise cutting. It features adjustable speed settings for adapting to different materials and tasks.

## ADDITIONAL IMAGES

## Overview

### Professional Electric Wood Router

This high-performance electric wood router is engineered for precision woodworking, offering a robust 1950W motor capable of handling demanding routing tasks. With adjustable speed settings ranging from 600 to 23,000 RPM, it provides the versatility needed for various materials and cutting requirements. The tool features a calibrated depth control system for accurate adjustments up to 60mm, ensuring consistent results for edge forming, grooving, and decorative work.

## Performance

### Input Power

**1950 W**

Power Output

No Load Speed Range 600 - 23,000 r/min

Working Depth 60 mm

## Technical Specifications

### Available Voltage Models

Item Code	Voltage	Collet Sizes Included
P800904	220-240V	6mm, 8mm, 12mm
P800904A	110-120V	1/4", 1/2", 12mm

Chuck Diameter 12 mm

## Features

### Key Features

- Soft handle for comfort and control
- Large calibrated depth control ring
- Shaft lock for quick bit changes
- Conveniently located plug lock for efficient operation
- Hi-speed motor for smooth cuts
