

19.7 x 4 x 8 Inch Grinding Wheel

This grinding wheel has a 19.7-inch outer diameter, 4-inch thickness, and 8-inch bore diameter. Constructed from durable abrasive materials, it offers consistent grinding performance and extended service life.

Product Overview

High-Performance Grinding Solution

This durable Aluminum Oxide grinding wheel is engineered for precision material removal and consistent performance. It is widely utilized for rough grinding applications across various materials, including carbon steel, general steel, malleable cast iron, and hard bronze. Designed for longevity and reliability, this tool is an essential asset for sharpening, shaping, and finishing tasks in industrial environments.

Physical Dimensions

Outer Diameter	19.7 inch
Thickness	4 inch
Bore Diameter	8 inch

Technical Specifications

Primary Applications

- Rough grinding
- Sharpening
- Shaping
- Finishing

Abrasive Material	Aluminum Oxide
Compatible Materials	Carbon Steel, General Steel, Malleable Cast Iron, Hard Bronze
