

19mm Metal Push Button with Buzzer and LED

This metal push button has a 19mm aperture and includes a continuous sound buzzer. It also features an integrated LED lamp and is designed for welding type connections.

Overview

Robust Industrial Signaling Solution

This 19mm metal push button is engineered for demanding industrial environments, combining tactile operation with integrated visual and audible feedback. Featuring a durable metal construction, it includes a built-in LED lamp and a continuous sound buzzer for clear status indication. This versatile component is ideal for integration into control panels, automation systems, and heavy-duty machinery where reliable signaling is critical.

Technical Specifications

Mounting Aperture	19 mm
Operating Voltage	24 V
Connection Method	Welding Type

Features

Integrated Functions	LED Lamp, Continuous Sound Buzzer, Metal Housing
----------------------	--

Applications

Typical Applications

- Control Panels
- Industrial Machinery
- Automation Systems
