

# 19mm Metal Push Button with Buzzer

This 19mm metal push button features a continuous tone buzzer and welding type terminals. It is designed for robust applications, providing both visual and audible feedback.

## Overview

### Rugged Industrial Signaling

This 19mm metal push button is engineered for demanding industrial environments where both visual and audible feedback are required. Featuring a continuous tone buzzer, it ensures clear signaling for machinery and control panel operators. The robust metal construction and secure welding-type terminals provide long-term reliability and stability.

## Technical Specifications

Mounting Diameter	19 mm
Buzzer Type	Continuous Tone
Operating Voltage	24 V
Termination Style	Welding Type

## Features

Key Features	Metal Construction, Audible Feedback, Industrial Grade, Secure Connection
--------------	---

## Applications

### Typical Applications

- Industrial Control Panels
- Heavy Machinery
- Signaling Systems
- Automation Equipment
