Product Overview

High-quality single spring mechanism designed for consistent sealing pressure.

High-Performance Single Spring Mechanical Seal

The HF560 series mechanical seal is a precision-engineered component designed specifically for water pump applications. Featuring a robust single spring mechanism, this seal ensures consistent sealing force to prevent leaks and maintain system integrity. Built for durability, it offers wear resistance, low friction, and reliable performance across various industrial and HVAC&R environments.

Key Features

Advantages

Wear resistant, Low friction, Easy replacement, Customizable, Wide application

Dimensional Reference

Model	Shaft (d1)	Seal Face (d3)	Outer (d7)
HF560C-10	10	20.05	21
HF560C-20	20	31.75	35
HF560C-50	50	67.35	70
HF560C-100	100	124	125

Model Number	HF560C-60
Shaft Diameter Range	10mm to 100mm
Material	Metal

Logistics & Service

Professional packaging including rust-proof wrapping and secure boxing.

Shipping Methods

EMS • FedEx • DHL • TNT • UPS

Accepted Payment Methods

- T/T (Telegraphic Transfer)
