

1kW Portable Inverter Gasoline Generator

This 1kW inverter gasoline generator is designed for efficient power generation. Its compact design and lightweight construction make it ideal for camping, RVs, and powering small electronic devices.

Product Overview

Clean and Reliable Portable Power

This 1kW portable inverter gasoline generator is engineered to provide stable and clean electricity, making it ideal for sensitive electronic devices, camping, and RV use. It features an intelligent throttle system that automatically adjusts engine speed to match the load, ensuring maximum fuel efficiency and reduced noise levels. With its compact, lightweight design and parallel connectivity options, it offers a versatile power solution for various professional and recreational needs.

Performance Metrics

Key Performance Metrics

1000 W Peak Power	800 W Rated Output	120 V AC Voltage
-----------------------------	------------------------------	----------------------------

Noise Reduction Technology	Yes
-----------------------------------	-----

Engine & Efficiency

Load-Dependent Operation

The integrated smart throttle system automatically maintains engine speed at the most efficient level based on the current load. This technology significantly reduces fuel consumption, vibration, and noise while ensuring clean output power.

Power Outlets & Connectivity

Available Outlets

Outlet Type	Specifications	Application
AC Outlet	120V	Standard appliances and electronics
DC Socket	12V / 8A	Charging automotive lead-acid batteries
Parallel Port	Dual-link capable	Connecting two units to double output

Safety & Protection

Safety Indicators

Overload Protection, Indicator Reset, Pilot Lamp, DC Overload Protector, Reset Button

Physical Design

Construction Details

- Anti-skid shock-absorbing feet for smooth operation
- Integrated petcock in ON/OFF switch to prevent fuel contamination
- Ergonomic carry handle for easy transport
- Compact and lightweight construction
