

1P+N Residual Current Circuit Breaker with Overload Protection

This 1P+N residual current circuit breaker (RCCB) provides protection against electrical leakage and overcurrents. It is designed with a test button, leakage trip indicator, and reset function.

Product Overview

Reliable Circuit Protection

This 1P+N Residual Current Circuit Breaker (RCCB) with integrated overload protection is engineered for robust electrical safety in residential and commercial environments. Designed with high-quality BMC and Nylon materials, it offers excellent heat resistance and durability for long-term reliability. The device features a clear leakage trip indicator and a user-friendly test function, ensuring consistent performance and ease of maintenance.

Technical Specifications

Available Rated Currents

- 6
- 10
- 16
- 20
- 25
- 32
- 40
- 50
- 63

Rated Voltage	AC 230V
Breaking Capacity	4500 A
Residual Operating Current	15mA - 30mA
Tripping Time	0.03s - 0.08s

Compliance & Standards

Standards Compliance	IEC60898, IEC61009, IEC60947, IEC60947-2
----------------------	--

Features & Construction

Key Features

Breaking Indicator Light • Overload Protection • Test Button • Leakage Trip Indicator • Heat-Resistant Material

Construction Materials

800 °C

BMC Heat Resistance
