Overview

Versatile Single-Phase Lifting Solution

This 1T electric wire rope hoist is a versatile lifting solution designed for use in factories, workshops, warehouses, and residential settings. It features a compact, simple structure with low noise operation, making it ideal for transporting heavy goods between floors in high-rise buildings. Powered by standard single-phase electricity, it offers a safe and reliable performance for a wide range of conveyance and decoration tasks.

Performance Metrics

Lifting Capacity

500 kg

Single Line Capacity

1000 kg

Double Line Capacity

Lifting Height

12 m

10 m

Double Line Height

Technical Specifications

Lifting Speed

Configuration	Speed
Single Line	9 m/min
Double Line	4.5 m/min

Motor Power 1650 W

Cable Diameter 5.6 mm

Operating Voltage 220V

Safety & Operation

Safety Features

- Automatic brake feature
- Emergency stop button
- Overload protection
- Limit switches
- Safety latch on hook

Control System Heavy-duty toggle switch control pendant with up/down buttons

Duty Cycle 10 min. at 20%

Compliance & Quality

Quality Certifications CE, EMC, GS, TUV, ETL, C-ETL

Applications

Recommended Environments

Factories • Workshops • Warehouses • Restaurants • High-rise Buildings • Garages
