

1U Rack Mount Fiber Optic Distribution Frame

This 1U rack mount fiber optic distribution frame is made from high-quality cold-rolled steel with a surface electrostatic spraying treatment. It supports a maximum of 48-core SC or 96-core LC and includes a front-end cable management system.

Product Overview

Professional Fiber Distribution

This 1U rack-mountable optical fiber distribution frame is engineered for efficient cable management and reliable connectivity in telecommunications and data center environments. Featuring a durable cold-rolled steel construction with a sleek black finish, it ensures secure termination and distribution of fiber optic cables. The design includes a sliding tray mechanism for easy access, facilitating streamlined maintenance and organization.

Physical Construction

Frame Material	Cold rolled steel plate
Splice Tray Material	ABS
Form Factor	1U Rack Mount

Environmental Specifications

Operating Temperature Range

-10 °C Min Operating	60 °C Max Operating
--------------------------------	-------------------------------

Storage Temperature Range

-40 °C Min Storage	68 °C Max Storage
------------------------------	-----------------------------

Relative Humidity	10% ~ 90%
