

2-2.5 Ton Forklift

This forklift is designed for efficient material handling in warehouses and distribution centers. It has a lifting capacity between 2 to 2.5 tons.

Overview

Professional Material Handling

This 2-2.5 ton forklift is engineered for high-performance material handling in demanding warehouse and distribution environments. Featuring a robust mast design and a protective overhead guard, it ensures operator safety while maintaining exceptional stability. Its durable tires and versatile maneuverability make it an essential asset for efficient logistics and heavy-load transport operations.
