

2-4T Manual Hand Puller Winch

This hand puller winch is designed for lifting and pulling applications. Its robust construction ensures reliable performance in agricultural and construction settings.

Overview

Professional Manual Hand Puller

This versatile manual hand puller is engineered for reliable lifting, pulling, and tensioning tasks in demanding environments such as construction sites and agricultural settings. Featuring a lightweight yet robust aluminum frame and high-quality galvanized wire rope, it ensures durability and ease of handling. The integrated ratchet and pawl system, combined with safety-latched alloy steel hooks, provides secure operation for temporary anchoring and work-at-height applications.

Technical Specifications

Available Capacities

- 1T (Single Gear)
- 2T (Single Gear)
- 2T (Double Gear)
- 3T (Single Gear)
- 3T (Double Gear)
- 4T (Double Gear)

Safety Features

Safety Latches • Ratchet and Pawl System

Construction Materials

Aluminum Frame, Alloy Steel Hooks, Galvanized Wire Rope

Primary Applications

Work at Height, Temporary Anchor, Lifting, Tensioning
