Overview

Professional DSP Amplifier Module

The AF Series 2-channel DSP amplifier module is engineered specifically for active speaker systems, providing advanced digital signal processing for precise audio control. This module is designed for professional audio applications, ensuring high-quality amplification and sound optimization. It features a comprehensive suite of input and output connectivity options, making it a versatile solution for custom speaker integration.

Connectivity

Interface & Controls

- Power Switch
- Fuse Protection
- Status Indicators

Connectivity Options	XLR, Link, To Host, From PC, AES/EBU, Bass CTL Output
----------------------	---

Compliance

Certifications

CE • RoHS

Technical Specifications

Channels	2
Primary Use	Active Speaker Systems
