

## 2-in-1 Clean and Dirty Water Pump

This versatile 2-in-1 water pump is designed for both clean and dirty water applications. It is equipped with a float switch for automatic operation and thermal overload protection for safety.

### ADDITIONAL IMAGES

### Overview

#### Versatile 2-in-1 Water Management

This submersible pump is engineered to handle both clean and dirty water applications, making it a highly versatile tool for various drainage and water transfer tasks. Featuring a durable plastic housing, it is designed for reliability in domestic and professional environments. The unit includes an integrated float switch for automatic operation, ensuring efficient performance while preventing dry running.

### Technical Specifications

#### Power Range

**400 W**

Minimum Power

**600 W**

Maximum Power

#### Pump Type

Submersible

#### Housing Material

Plastic

### Features

#### Key Features

- 2-in-1 Clean and Dirty Water functionality
- Integrated float switch for automatic operation
- Thermal overload protection
- Submersible design

#### Safety & Protection

Thermal Overload Protection • Dry Run Prevention

## Applications

### Typical Applications

Flooded area drainage, Pond emptying, Water transfer, Basement drainage
