Product Overview

Versatile Heating Solution

This 2-in-1 convection and radiant space heater offers a dual-action approach to climate control, combining efficient convection heating for whole-room circulation with radiant technology for immediate, direct warmth. Designed with flexibility in mind, the unit features adjustable heat settings and a free-standing, portable architecture suitable for homes and offices. With built-in safety mechanisms like overheat protection and a tip-over switch, it provides a reliable and versatile supplemental heating solution for various indoor environments.

Technical Specifications

Power Output Options

1500 W
Low Setting

2000 W
High Setting

Model Number	ZL-041
Heating Elements	3 Carbon Fibre Quartz heating elements
Number of Heat Settings	4
