Product Overview

Precision Powder Coating Nozzle

This 2-inch powder coating nozzle is precision-engineered to provide optimal powder dispensing for industrial applications. Constructed from durable brass, the unit ensures consistent and accurate flow rates during operation. Its specialized tapered design focuses the delivery of material, which helps minimize waste while maximizing overall coating efficiency.

Technical Specifications

Nozzle Size	2 inch
Material	Brass
Design Features	Tapered Design, Precision Engineered, High Efficiency

Performance Metrics

Performance Highlights

1 High

Flow Consistency

1 Maximized

Waste Reduction
