

2-inch Ceramic Roloc Mini Flap Discs 36 Grit

Professional grade quick change flap discs are designed for angle grinders. These 2" mini flap discs feature zirconia pro type R 36 grit abrasive material for efficient material removal.

Product Overview

Professional Quick-Change Grinding Solution

These 2-inch quick change mini flap discs are engineered for aggressive material removal and precise surface finishing in restricted spaces. Designed for compatibility with standard pneumatic straight and angle grinders, these discs excel at blending and smoothing complex workpieces. The high-performance abrasive surface is ideal for demanding applications involving steel, titanium, and non-ferrous metals.

Technical Specifications

Safety Compliance

EN 13743 • OSHA Compliant

Grit	36
Diameter	2 inch
Abrasive Material	Ceramic Alumina, Aluminum Oxide, Zirconium Oxide, Silicon Carbide

Compatibility & Usage

Suitable Workpieces

- Carbon steel
- Stainless steel
- Titanium
- Titanium alloys
- Non-ferrous metals

Tool Compatibility	Pneumatic straight and angle grinders with quick-change backing pads
