

2-Inch Gasoline Engine Water Pump

Powered by a 5.5HP gasoline engine, this water pump features a rigid mounted cast iron volute and impeller. It has heavy-duty full frame protection and 2" suction/discharge ports.

Product Overview

High-Efficiency Gasoline Water Pump

This 2-inch gasoline engine water pump is engineered for reliable and efficient water transfer across diverse environments, including irrigation, construction sites, and emergency drainage. Featuring a robust design and a powerful 5.5HP engine, it delivers consistent performance with a maximum flow rate of 27 cubic meters per hour. Its portable construction and protective frame ensure durability and ease of use in demanding professional applications.
