

2 inch Submersible Deep Well Water Pump

This 2-inch submersible deep well pump is designed for efficient water extraction from deep wells. It is made with durable materials for longevity and reliability in demanding environments.

Overview

High-Performance Deep Well Extraction

This 2-inch submersible deep well pump is engineered for efficient water extraction in demanding environments. Built with durable, high-quality materials, it ensures long-term reliability for a variety of applications, including irrigation, domestic water supply, and industrial operations. The pump features a robust motor and an optimized hydraulic design to maximize pumping efficiency.

Technical Specifications

Pump Diameter	2 inch
Suitable Applications	Irrigation, Domestic Water Supply, Industrial Use

Compliance & Standards

Quality Certifications

ISO 9001 • SGS • SASO • RoHS
