Overview

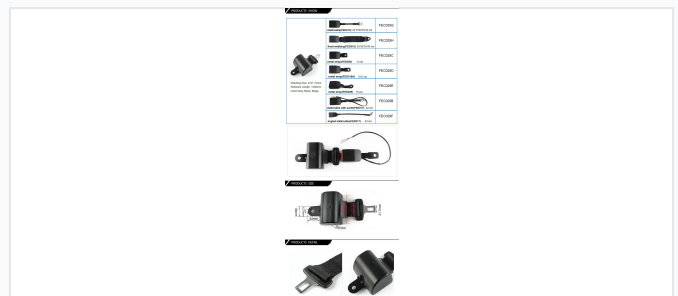

Professional Grade 2-Point Retractor Seat Belt

This versatile 2-point safety belt features an Emergency Locking Retractor (ELR) or Automatic Locking Retractor (ALR) system, providing a self-adjusting fit that enhances passenger convenience and safety. Designed for heavy-duty use in trucks, buses, and engineering vehicles, it utilizes high-strength polyester webbing and durable mounting hardware. The retractor mechanism ensures the belt remains protected and out of the way when not in use, making it an ideal solution for commercial vehicle seating.
