

## 2-Pole Induction Motor Water Pump

This two-pole induction motor water pump features class B insulation and IP44 protection. It is designed for continuous service and includes a thermal protector for single-phase operation.

### Overview

#### Reliable Water Transfer Solution

This 2-pole induction motor water pump is engineered for efficiency and reliability in domestic and civil applications. It is perfectly suited for clean water transfer, irrigation, and integration into pressure sets. Designed for durability, the unit features a robust pump housing and an externally cooled motor to ensure consistent performance over time.

### Technical Specifications

#### Installation Requirements

Enclosed Environment • Sheltered from Weather

Motor Type	2-Pole Induction Motor
Suitable Liquids	Clean Water, Non-aggressive Liquids

### Design & Construction

#### Connection Ports

- Top-mounted port
- Front-facing inlet

Cooling Mechanism	External cooling fins
Mounting	Sturdy feet for stable operation

### Key Features

#### Performance Metrics

**1 Low**
