Product Overview

Professional Engine Hoist

This 2-Ton Foldable Hydraulic Engine Crane is a robust lifting solution designed for automotive workshops and industrial use. Featuring a heavy-gauge structural steel construction and an 8-ton power unit, it provides reliable performance for moving heavy components like engines, transmissions, and axles. Its foldable design and 360-degree rotating wheels ensure easy maneuverability and space-saving storage when not in use.

Performance & Capacity

Adjustable Load Capacities

0.5 Ton Position 1	1 Ton Position 2	1.5 Ton Position 3	2 Ton Position 4
------------------------------	----------------------------	------------------------------	----------------------------

Hydraulic Ram Capacity	8 Ton
------------------------	-------

Dimensions & Reach

Installed Dimensions (LxWxH)	65" x 38.5" x 60"
Max Lifting Height (Min Extension)	88.8 inch
Max Lifting Height (Max Extension)	105 inch
Boom Extension Range	41.8" to 63"

Construction & Features

Maneuverability

- 360 Degree Rotating Wheels
- Low 4-inch clearance
- Push handle with rubber grips

Certifications

CE

Material

Heavy gauge structural steel

Logistics

Gross Weight

75 kg

Shipping Information

Ships in 2 packages; assembly required.
