

2-Ton Rubber Track Mini Dumper Truck for Palm Oil Fruit

This 2-ton rubber track crawler carrier is a mini dumper truck designed for efficient material handling. It provides excellent traction and stability on uneven terrain.

ADDITIONAL IMAGES

Overview

Versatile All-Terrain Crawler Dumper

This rubber track mini dumper is specifically engineered for efficient material transport in challenging environments like palm oil plantations and construction sites. Its robust crawler system ensures superior traction and stability across muddy, icy, and uneven ground where wheeled vehicles often fail. With a compact design and powerful performance, it simplifies the harvesting and hauling process in confined or difficult-to-reach areas.

Performance

Performance Metrics

2 Tons

Payload Capacity

45 °

Climbing Angle

Drivetrain & Transmission

Transmission System

- Multi-speed heavy-duty transmission
- 3 Forward speeds
- 1 Reverse speed
- High-top qualified engine

Chassis & Mobility

Terrain Compatibility

Muddy Ground, Icy Roads, Soft Soil, Uneven Terrain, Slopes

Track Type

Durable Rubber Track Crawler

Applications

Primary Applications

- Palm oil fruit harvesting and transport
- Agricultural material handling
- Construction site debris hauling
- Landscaping projects
- Mining support

Operational Features

Operator Features

Simple Operation • Easy Maintenance • Ergonomic Controls

Dumping Mechanism	Hydraulic tipping bed for easy unloading
Customization	Yes
Customization Note	Specific sizes can be customized according to demand
