

2-Ton Rubber Track Mini Dumper Truck

This 2-ton rubber track crawler carrier mini dumper truck is designed for efficient material handling in agricultural and industrial environments. Equipped with a robust crawler track system, it provides superior traction and stability on various terrains, including uneven and muddy surfaces.

ADDITIONAL IMAGES

Overview

Versatile All-Terrain Crawler Dumper

This mini crawler dumper is designed for high-efficiency material transport across challenging terrains including mud, icy roads, and uneven ground. Featuring a robust rubber track system, it provides superior traction and stability while minimizing ground pressure. Its compact design and multi-speed transmission make it an ideal solution for palm oil plantations, construction sites, and agricultural applications where maneuverability is essential.

Performance & Capacity

Load Capacity

2 Tons

Rated Payload

3 Tons

Maximum Payload Capacity

Climbing Angle

45 °

Engine & Transmission

Transmission

- Multi-speed heavy-duty transmission
- 3 Forward speeds
- 1 Reverse speed

Engine

Chinese high-top qualified engine

Chassis & Mobility

Track System

Rubber track crawler for all-terrain traction

Terrain Suitability

Muddy Ground, Icy Roads, Uneven Terrain, Wet Ground, Soft Soil

Operation & Maintenance

Operational Features

- Self-propelled mechanism
- Hydraulic dumping system for quick unloading
- Simplicity of operation
- Easy maintenance access
- Customizable specific sizes available

Applications

Primary Applications

Palm Oil Fruit Harvesting • Orchard Transport • Construction Material Handling • Agricultural Logistics • Landscaping
