

2-Way Manifold Gauge with Sight Glass

This AC 2-way manifold gauge features an oversized sight glass for easy viewing. The forged body is solid brass for durability, and the meter hand wheels are full size for easy operation.

Product Overview

Professional HVAC&R Manifold Gauge

This 2-way manifold gauge set is an essential tool for HVAC&R technicians, designed for accurate pressure and vacuum monitoring. It features distinct high-pressure (red) and low-pressure (blue) gauges, along with an integrated sight glass for real-time refrigerant flow observation. Built for durability, this manifold ensures reliable performance in demanding field applications.

Technical Specifications

Compatible Refrigerants	R22, R407C, R410A
Pressure Units	psi, bar

Operational Features

Gauge Configuration

- High Pressure Gauge (Red)
- Low Pressure Gauge (Blue)
- Integrated Sight Glass

Flow Control

The manifold body connects all three fittings via internal passages. Separate passages allow technicians to check pressure and vacuum readings regardless of whether the hand wheels are in the open or closed position.
