Overview

Professional Performance and Efficiency

This 54cc gasoline chainsaw is engineered for high-performance cutting while maintaining excellent fuel efficiency. Featuring an innovative combustion chamber design that improves ignition, it delivers 2.5kW of power while reducing overall fuel consumption. The system also includes an upgraded cooling mechanism that effectively lowers operating temperatures by 13% for consistent performance during demanding tasks.

Performance Metrics

Rated Power

2.5 kW

Kilowatts

3.3 hp

Horsepower

Technical Specifications

Engine Displacement	54 cc
Oil to Fuel Ratio	1:40

Cutting Equipment

Supported Bar Lengths

- 16 inches (40cm)
- 18 inches (45cm)
- 20 inches (50cm)

Chain Configuration

Component	Specification
Chain Brand	Oregon
Chain Pitch	0.325, 3/8

Certifications & Compliance

Certifications	GS, CE, EMC
