

20-Inch High-Velocity Floor Fan

This high-velocity floor fan features a durable steel wire guard. Its 20-inch diameter fan head delivers exceptional airflow for cooling large spaces.

Product Overview

High-Velocity Air Circulation

The 20-inch high-velocity floor fan is engineered for powerful air circulation, making it an ideal solution for cooling large spaces. Built with a durable metal frame and blades, this unit is designed to withstand demanding environments like garages and workshops. It features multiple speed settings and an adjustable tilt head, providing users with customizable and precise directional airflow control.

Technical Specifications

Fan Diameter	20 inches
Construction Materials	Steel Wire Guard, Metal Frame, Metal Blades

Features

Performance Highlights

20 in Blade Diameter	1 Yes Adjustable Tilt
--------------------------------	---------------------------------

Key Benefits

- High performance-to-price ratio
- Robust steel wire guard for safety
- Multiple speed settings
- Adjustable tilt for directional control
