

20-Piece Feeler Gauge Set

This 20-piece feeler gauge set is designed for precise measurement of small clearances and gaps. It includes blades of varying thicknesses, from 0.05mm to 1.00mm, for accurate measurements in diverse applications.

Overview

Precision Measurement Tool

This 20-piece feeler gauge set is designed for the precise measurement of small clearances and gaps in mechanical assemblies. Featuring blades ranging from 0.05mm to 1.00mm, it provides the accuracy required for demanding automotive, mechanical, and engineering applications. Constructed from durable materials, these gauges are built to withstand repeated use while maintaining measurement integrity.

Technical Specifications

Key Features

- 20 blades included
- Durable construction
- Precise gap measurement

Number of Blades	20 pcs
Measurement Range	0.05mm - 1.00mm
Part Number	100B20

Applications

Recommended Applications	Automotive, Mechanical Engineering, Precision Gap Measurement
--------------------------	---
