

20-ton Capacity Cargo Trolley

This equipment roller kit can also be used as a means of material transport. The heavy-duty machinery mover features connection holes on each end for pulling.

Overview

Heavy-Duty Cargo Movement Solution

The 20-ton capacity cargo trolley is a robust machinery mover designed for transporting heavy industrial equipment with precision and ease. Featuring a thickened load-bearing plate, this unit is engineered to prevent deformation under heavy loads, ensuring reliable performance in demanding environments. It serves as an essential tool for industrial and construction applications where safe and efficient material transport is required.

Technical Specifications

Load Capacity

20 ton

Capacity

Model Number

CT-20

Key Design Features

Thickened Load Plate, Deformation Resistant, Connection Holes for Pulling, Multiple Rollers

Usage

Ideal Applications

- Moving large production equipment
- General material transport
- Industrial machinery relocation
- Construction site logistics
