

20-Ton Electric Chain Hoist

This electric chain hoist is designed for lifting applications. It is equipped with a forged hook, limit switch, and a low-headroom double reducer.

Product Overview

Heavy-Duty Electric Lifting Solution

This 20-ton electric chain hoist is engineered for demanding industrial environments and construction applications. It features a robust, carburized chain construction for superior durability and is equipped with an integrated cooling fan to maintain performance during operation. With precision mechanical load brakes and gear deceleration, it offers a reliable and safe solution for heavy-load material handling.

Performance Metrics

Key Performance Indicators

20 ton

Load Capacity

2.8 m/min

Minimum Lifting Speed

6.8 m/min

Maximum Lifting Speed

Technical Features

Safety and Build

- Carburized high-strength chain
- Integrated cooling fan
- Mechanical load brake
- Deceleration chain gear

Operation Modes

Single Speed, Double Speed
