Overview

Heavy-Duty Performance

This 20-ton heavy-duty dump truck is engineered for demanding construction and mining environments. Featuring a robust 6x4 drive configuration, it offers superior stability and traction on rough terrain. Built with high-tensile steel, the cargo bed is designed to withstand the rigors of transporting minerals, stone, and sand.

Technical Specifications

Load Capacity

20 ton

Standard Load

25 ton

Maximum Load

Cargo Volume

20 cbm

Drive Configuration

6x4

Construction & Materials

Steel Thickness Options

- 4
- 6
- 8
- 10

Tipping Mechanisms

Front-tipping, Middle-tipping

Applications

Primary Use Cases

Construction • Mining • Mineral Transport • Aggregate Transport
