

20-Ton Hydraulic Bottle Jack for Welding

This hydraulic bottle jack has a 20-ton capacity and is designed for welding applications. It features a robust construction for reliable lifting power.

Overview

Heavy-Duty Lifting Solution

This 20-ton hydraulic bottle jack is specifically engineered for demanding welding environments and heavy-duty industrial applications. Its robust construction ensures reliable lifting power and long-term durability in automotive and construction settings. Designed to provide a stable and secure lifting platform, this tool is an essential asset for professional maintenance and assembly operations.

Technical Specifications

Lifting Capacity

20 t

Rated Capacity

Model Identifier

TJ2001

Application

Suitable Industries

Automotive, Construction, Industrial, Welding
