Overview

Heavy-Duty Hydraulic Pressing

This 20-ton hydraulic shop press is engineered for demanding industrial and automotive tasks, including bending, straightening, and forming. Featuring a robust H-frame design with a powder-coated finish, this unit is built for durability and corrosion resistance. It includes a foot-operated single pump and an adjustable table with eight height positions, ensuring versatile and safe operation for a variety of workpiece sizes.

Technical Specifications

Pressing Capacity

20 tonne
Capacity

Cylinder Stroke	185 mm
Working Height Positions	8
Pressure Gauge Included	Yes
Press Plate Dimensions	190 x 100 x 25 mm

Features

Key Features

- Foot-operated single pump
- Hard chromium-plated piston rod
- Adjustable working table
- Detachable pump and ram
- High-strength powder-coated H-frame

Ideal Applications Automotive Repair, Metalworking, Bearing Removal, Straightening, Bending
