

200 kVA Diesel Generator

This diesel generator provides 200 kVA of power. It is engineered for dependable and efficient power generation in diverse industrial and commercial settings.

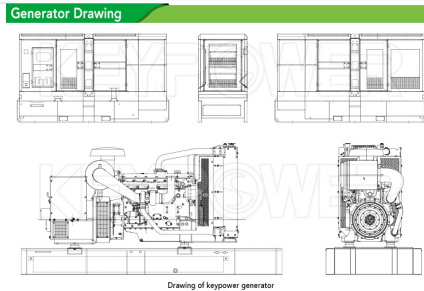

Product Overview

Reliable Power Generation

This 200 kVA diesel generator is engineered for dependable and efficient power output in demanding industrial and commercial environments. Built according to strict international standards, the unit features a robust enclosure and flexible configuration options, including open, silent, and super-silent setups. Designed for long-term performance, it incorporates high-quality components and rigorous quality management to ensure consistent operation.

Technical Specifications

Detailed technical layout and dimensions for installation planning.

Configuration Types

- Open type
- Silent type
- Super silent type

Power Rating	200 kVA
Engine Type	Industrial Diesel Engine
Alternator	Branded industrial-grade alternator

Compliance & Quality

Certifications

Certified compliance with international quality management and environmental standards.

Manufacturing Standards

International Standards Compliant • Quality Management System Certified

Certifications

CE, ISO 9001, ISO 14001, TUV
