

200 Liter Bearing Water Tank

This 200 liter bearing water tank is designed for efficient water storage and distribution. Constructed with durable materials, it ensures longevity and reliability.

Product Overview

200 Liter Bearing Water Tank

This 200-liter bearing water tank is engineered for efficient water storage and reliable distribution in various industrial and commercial applications. Built with a durable BTC340R inner vessel and a protective galvanized steel shell, it offers a robust solution for long-term use. Its compact design and integrated heat exchanger make it a versatile choice for systems requiring consistent thermal management.

Technical Specifications

Capacity	200 L
Inner Vessel Diameter	438 mm
Overall Tank Diameter	520 mm

Construction & Materials

Inner Vessel Material	BTC340R
Inner Vessel Thickness	2 mm
Shell Material	Galvanized Sheet
Shell Thickness	0.5 mm
Insulation Thickness	40 mm

Performance

Top Heat Exchanger Surface Area

0.4 m²

Surface Area
