Overview

High-Efficiency Mobile Crushing Solution

This 200 TPH mobile stone crusher is a high-performance solution designed for mining and quarry applications. Engineered for efficiency, it features advanced crushing technology, high-strength wear-resistant materials, and integrated material handling systems. Its mobile design allows for easy setup and relocation, making it an ideal choice for aggregate production, recycling, and demolition projects.

Performance & Capacity

Throughput Capacity

200 TPH
Capacity

Compatible Materials

Granite, Basalt, Limestone, Gravel, Concrete

Technical Specifications

System Components

- Mobile Jaw Breaker
- Feed Grate
- Large-volume Silo
- On-board Hydraulic Lubrication Station
- Vehicle Belt Conveyor
- Dust-reduction Sealing System

Model

KX300-2

Configuration Options

Available Configurations

Configuration Type

Four & Three Combination Production Lines

Primary Crushing Equipment

Secondary Crushing Equipment

Screening Equipment

Integrated Crushing and Screening Station
