

2000-Ton Heavy-Duty Gantry Crane

The 2000-ton gantry crane is designed for heavy lifting and material handling in industrial environments. It features a robust steel structure and multiple lifting points for efficient load management.

Product Overview

Heavy-Duty Lifting Solution

The 2000-ton gantry crane is engineered for high-capacity industrial operations, providing exceptional stability and durability for extremely large loads. Featuring a robust steel structural framework and advanced hoisting mechanisms, it ensures precise and controlled handling in demanding environments. This crane is an ideal solution for shipbuilding, large-scale construction, and heavy manufacturing projects requiring superior lifting power and operational flexibility.

Technical Specifications

Lifting Capacity	2000 ton
Key Features	Dual Trolley System, Motorized Trolleys, High-Strength Steel Frame, Advanced Hoisting Mechanisms

Safety & Control

Safety Systems

- Overload protection
- Emergency stop mechanisms
- Anti-collision systems
- Comprehensive monitoring systems

Applications

Suitable Industries

Shipbuilding • Bridge Construction • Heavy Manufacturing • Port Operations
