

2000A Single Pole Current Transformer

This tape-wrapped current transformer comes in six standard silicon steel core frame sizes. It is suitable for use with or without a foot and plastic cover.

Product Overview

Professional Current Sensing

This single pole current transformer is engineered for high-current applications up to 2000 Amps. Utilizing a standard silicon steel core, the unit is designed for precision and reliability in power transmission and distribution monitoring. Its flexible configuration options allow for integration with or without foot mounts and protective plastic covers, ensuring suitability for various industrial environments.

Technical Specifications

Maximum Current Rating

2000 A

Rated Current

Core Material	Silicon steel core
Configuration Options	Foot mounted, Plastic cover
Available Frame Sizes	6

Safety & Installation

Important Safety Precautions

- Secondary circuit must be earthed during use
- Primary circuit must be wrapped around the core carefully
- Follow proper grounding protocols for high-current sensing
