Overview

Professional Hot Air Solution

The PLD2231 is a versatile 2000W hot air gun engineered for efficiency and precision in various tasks, including paint stripping, varnish removal, and heat shrinking. Featuring three distinct heat settings and an advanced coil design, it delivers rapid heating and consistent temperature control. Its ergonomic soft-grip design and high-stability base make it suitable for both handheld operation and stationary use, ensuring comfort and safety during extended professional projects.

Technical Specifications

A comprehensive overview of our heat gun series, showcasing the PLD2231 model specifications.

Model	PLD2231
Power Consumption	2000 W
Voltage	220-240V
Frequency	50 Hz

Performance

Detailed performance metrics for the PLD2231 model, highlighting temperature and airflow settings.

Heat and Airflow Performance

Setting	Temperature	Air Flow
I	50°C	250 L/M
II	50-450°C	250 L/M
III	50-600°C	500 L/M

Features

Key Features

- 3 fan settings for versatile application
- Continuous adjustable temperature control
- Constant Heat Control system to prevent overheating
- Integrated over-heat protection
- High stability design for stationary use
- Ergonomic soft-grip handle

Usage Suitability

Paint Stripping • Varnish Removal • Decal Removal • Wire Wrapping • Pipe Thawing
