

2000W Induction Cooktop with Low Voltage Start

This induction cooktop has a maximum power of 2000W. It features low voltage start, adjustable power and temperature settings, and a dedicated stir-fry mode.

Overview

Professional Induction Cooking Solution

This high-performance induction cooktop is engineered for efficiency and precision, featuring a 2000W rated power output with an advanced low-voltage start capability. Designed with a sleek, flat black crystal glass surface, it offers intuitive touch controls and a high-tech interface that is both waterproof and easy to clean. Ideal for professional or intensive home use, it includes specialized stir-fry modes and intelligent voltage monitoring to optimize energy consumption.
