

2000W Mica Space Heater with Adjustable Thermostat

This mica space heater is designed for efficient and rapid heating. It features an adjustable thermostat, overheat protection, and tip-over protection.

Product Overview

Efficient Mica Heating Technology

This 2000W Mica Space Heater is designed for rapid and efficient heating in small to medium-sized environments. Utilizing advanced mica heating elements, it provides consistent warmth while maintaining a compact and portable footprint. Equipped with essential safety features including overheat protection and a tip-over switch, this unit is built for reliable, supplemental heating.
