

200cc Dual-Sport Motorcycle

This dual-sport motorcycle is designed for both on-road and off-road use. It features a 200cc air-cooled engine, telescopic front fork, rear monoshock suspension, and reliable braking.

Overview

Dual-Sport Versatility

The 200GY-2 is a versatile dual-sport motorcycle engineered to perform reliably on both paved roads and rugged off-road terrain. Powered by a balanced 200cc air-cooled engine, it offers an optimal combination of fuel efficiency and responsive power for varied riding conditions. With its robust suspension system and specialized tires, this motorcycle provides riders with the stability and comfort needed for adventurous journeys.
