Overview

Reliable Heavy-Duty Cargo Transport

The DB200ZH is a robust cargo motor tricycle engineered for efficient and reliable transportation of goods in commercial and industrial settings. Featuring a powerful 200cc engine and a reinforced cargo bed, it is specifically designed to handle heavy loads across various terrains. This model is EEC approved, ensuring it meets rigorous European safety and environmental standards for professional use.

Performance & Engine

Engine Displacement

200 cc

Engine Capacity

Compliance & Standards

Certifications

EEC Approved • European Safety Standards • Environmental Compliant

Chassis & Build

Key Build Features

- Reinforced cargo bed for heavy-duty hauling
- Sturdy frame construction
- Durable tires for various terrains
- Reliable suspension system for stability
- High load-bearing capacity

Operational Use

Ideal Applications

Commercial Transport, Industrial Logistics, Heavy-Duty Delivery, Cargo Hauling

Maintenance

Maintenance & Design

Prioritizes practicality and ease of maintenance for long-term industrial use.
