

# 200CC Water-Cooled Gasoline Garbage Tri-cycle

This 200CC water-cooled gasoline tricycle is specifically designed for garbage collection. It features a robust frame and a large-capacity cargo box with a hinged cover.

## ADDITIONAL IMAGES

## Product Overview

### Efficient Waste Management Solution

This 200CC water-cooled gasoline tricycle is engineered specifically for reliable waste collection and transportation. Featuring a robust chassis and a high-capacity cargo bed with a hydraulic tipper system, it is designed to handle heavy daily workloads in both urban and rural environments. Its three-wheel configuration ensures stability and maneuverability, making it an ideal choice for municipalities and waste management organizations.

## Performance & Engine

### Engine Specifications

- 200cc displacement
- Water-cooled system
- 1-cylinder, 4-stroke
- CDI Ignition
- Electric and Kick start system

### Capacity

**800 kg**

Load Capacity

### Transmission

5 forward + 1 reverse

## Chassis & Suspension

### Chassis & Suspension

Component	Specification
Chassis Frame	40*80
Front Suspension	Dragon front shock, #50
Rear Suspension	Thickened steel plates (7+2)
Rear Axle	Booster type, 220mm drum

## Cargo & Equipment

Cargo Bed Dimensions	1.8m x 1.3m
Tipper System	Yes

## Technical Details

Tire Configuration	5.00-12 (Double rear tire)
Brake System	Drum brake
Battery	14 A
