

200km/h AC Transmission Electric Multiple Unit

The electric multiple unit is designed for operation at speeds up to 200km/h. It features a power-separated configuration with AC transmission for efficient and reliable performance.

Overview

High-Speed Intercity Transport

The 200km/h AC Transmission Electric Multiple Unit is an advanced rail solution designed for efficient intercity passenger transport. Featuring a modern power-separated configuration with AC transmission, this unit ensures reliable performance and high operational speeds. It is engineered to provide a comfortable travel experience while meeting the rigorous demands of modern railway infrastructure.

Technical Specifications

Maximum Operating Speed

200 km/h
Max Speed

Transmission System	AC Transmission
Configuration	Power-separated type

Application

Primary Use Case	Intercity Transport, Passenger Rail, High-Speed Transit
