

# 200L All-In-One Heat Pump Water Heater for Home Use

This 200L heat pump water heater integrates the heat pump and water tank. It ensures high efficiency and a longer life with its titanium heat exchanger.

## ADDITIONAL IMAGES

## Overview

### Efficient Residential Hot Water Solution

This 200L all-in-one heat pump water heater is designed for efficient, reliable domestic hot water production. By utilizing advanced heat pump technology, it offers energy savings of up to 75% compared to traditional electric water heaters. The system features a durable titanium heat exchanger and an intelligent microprocessor controller, ensuring long-term performance and ease of use for residential applications.

## Key Features

### Energy Savings

**75 %**

Energy Savings vs Electric

### Core Technologies

Titanium Heat Exchanger, Hydrophilic Aluminum Fins, Intelligent Microprocessor Control, Automatic Defrosting

## Technical Specifications

### Safety Protections

- Anti-freezing protection
- Water flow protection
- Over high pressure protection
- Over low pressure protection
- Insufficient water flow protection

### Tank Capacity

200 L

### Casing Material

Stainless Steel

## Compliance & Logistics

### Certifications

CE • ROHS

### Shipping Information

Method	Estimated Time
Sea Express	20-40 Days
